There's no news.

Ineos, DeSmog Global Warming DeniersWebsite, Companies, Reports Ineos is a privately owned multinational chemicals company based in London but registered in Luxembourg's tax haven. It is in the top 10 chemical manufacturing companies measured by sales revenue. James Ratcliffe is the founder, president and 60% shareholder. Ratcliffe, Currie and Reece own equity; Ratcliffe has 60%, with Currie and Reece owning 20% each. Plastics: Ineos manufactures raw materials for products such as bottle caps and toothpaste to computers and automobiles - in other words, plastics. Ineos uses fracked gas imported from the U.S. to produce huge amounts of disposable, single-use plastic, and that is the same plan for fracked gas in the United Kingdom.ref In February 2019, the group paid a dividend of 1.45bn euros to its parent company, INEOS Holdings Luxembourg SA. AR-2018, p.F086 ToDo Video: Who are Ineos. Ineos has an environmental record: 8:57. It already imports underwaster gas to make plastics. Fracking and Plastic: 22:33, Apr.03.2017: Fracking firm Ineos leads the industry lobbying to avoid green taxes. Ineos is privately leading an attempt to lobby the industry to avoid paying the cost of decarbonizing Britain's economy. Ineos is pressuring the government to use Brexit as an opportunity to exempt the chemical sector completely from climate policy costs. Currently, energy users pay a levy to support green energy suppliers, such as offshore wind farms. Last week, the government announced cuts worth 100 million euros to heavy-duty energy bills, meaning the chemicals, cement and steel sectors will pay less to subsidize low-carbon power generation. This new aid is aware of the exemptions of EUR 250 million already granted to these energy-intensive industries, but Ineos is driving even more generous treatment. The cash comes from Chemistry Growth Association, a government industry initiative. Ineos is a member, and Tom Crotty is its director. The stated goal of Ineos and the CGP is to pave the way for fracking. Ineos recently increased its shale gas prospects in the UK by 10% when it purchased 15 shale licences from French energy company Engie. You now have the right to explore across 1.2m acres in the East Midlands, Yorkshire and Cheshire. The Adam Vaughan, FOE Briefing on Ineos, September 2016. Link The agency's clients include INEOS, the 36 billion pound company that led fracking in the UK, which months earlier had led a lobbying effort to use Brexit as a way to exempt the chemical sector from climate policy costs. The latest additional role of INEOS director Tom Crotty as head of a new CBI manufacturing board focused on Brexit. Crotty also leads the Chemistry Growth Association, the same lobbying group mentioned above, which pushed ministers for climate cost exemptions. (ref?) People Jim Ratcliffe 1998: President 1998: led Inspec to lead the acquisition of Inspec's Ineos plc (then Ineos Oxide). Ratcliffe raised the necessary finances, everything he owned, as well as a combination of loans and venture capital, to buy the Antwerp site. Ineos was born. (Inspec was later acquired by Laporte.) 1992: Led BP's successful purchase of Inspec Group plc, along with John Hollowood, and Advent's endorsement. Hollowood was the president, ratcliffe's chief executive. Inspec was mainly in specialized high-margin chemicals, but also owned a cyclic chemicals business, a plant based in Antwerp that produced the type of chemical raw materials whose prices go up and down with the overall cycle of the economy. Inspec Group plc Advent International Corporation, a private equity group moved to Courtauld's He began his career with Exxon Chemicals Andy Currie 1999: Director of Ineos. 1998: Ceo of Laporte Performance Chemicals, following the acquisition of Inspec by Laporte. 1994: Director of the Inspec Group. He spent the first 15 years of his career with BP Chemicals in various technical and business management roles. John Reece Jan.2000: Chief Financial Officer, formerly a partner at PricewaterhouseCoopers, where he advised companies in the chemical industry. Jim Dawson Company Ineos is organized into about 20 independent business units, each with its own board. ToDo Property: When deselecting the company structure, start here: OC, CH INEOS is a global manufacturer of petrochemicals, specialty chemicals and petroleum products. It comprises 34 companies, each with an important heritage of the chemical company. Its production network covers 171 sites in 24 countries around the world. Companies House search, James Arthur Ratcliffe Companies House, Ineos Treasury (UK) Ltd A/cs 2017, p.104 J A Ratcliffe, ultimate controlling company Ineos Ltd, ultimate parent company co. Shareholders: J Ratcliffe (61.8%), A Currie (19.2%), J Reece (19%), reg. Isle of Man. (AR-2017, p.35,102,104) Ineos Holdings Luxembourg, SA has 100% of the share capital issued Group Holdings SA, reg. Luxembourg Ineos Luxembourg I SA, 100%, holdco, reg. Luxembourg INEOS Investments (Jersey) Ltd controlled by IGH's main shareholders, but not a member of the INEOS Group; as a result of the Refining Disinvestment, it holds a 50.1% stake in Refining Business JV, 49.9% 49.9% in the JV Business Business, a direct 50.0% stake in the Infrastructure Entity and an indirect 25.05% stake in the Infrastructure Entity through its 50.1% stake in the Refining Business JV; Ineos Group Holdings SA Ineos AG is a subsidiary of Ineos Ltd, reg. He was Ineos Capital Partners for April 2010. He was the ultimate father in 2011. Ratcliffe, Currie and Reece were the partners. Owns and controls a number of operating subsidiaries that are not included in the Ineos Group Holdings SA group, including Kerling plc and Ineos Industries Ltd. (2012, p.F-81) Ineos Holdings AG is a wholly owned subsidiary of Ineos AG Ineos Holdings Luxembourg SA owns 100% of the share capital issued by Ineos Group Holdings SA Ineos Holdings AG owns 100% of the voting share capital issued by Ineos Holdings Luxembourg SA The remaining capital of non-voting shares is held by Estera (Jersey Trust) Trustee of the INEOS Group Equity Benefits Trust, by Estera Nominees (Jersey) Ltd and certain employees, former employees or their families. Dec.2012: Appleby Trust (Jersey) Ltd, INEOS Share Benefit Trust Group Trust, by Appleby Nominees (Jersey) Ltd Ineos Holdings AG holds a controlling stake in Ineos Holdings Luxembourg SA through its majority stake in voting share capital. Ineos AG owns 100% of INEOS Holdings AG's issued share capital, 94.9% is held by Ineos Ltd and 5.1% directly by James Ratcliffe, Andrew Currie and John Reece. INEOS Ltd became the Group's last parent company on 201.2016 in December 2016. See also Administration and Certain Related Party Relationships and Transactions. Ineos AG is a subsidiary of Ineos Ltd, providing operational management services to the group. Ineos Ltd owns and controls operating subsidiaries that are not included in the Ineos Group Holdings SA; p.105 INOVYN Ltd Ineos Industries Ltd (which as of September 1, 2017 includes Grangemouth's petrochemical subsidiaries) INEOS Enterprises Ltd Lavéra active and petrochemical business, together with other French and Italian assets of INEOS O&P South, the refining joint ventures between PetroChina and INEOS Investments (Jersey) Ltd and INEOS Investments (Jersey) Ltd Joint venture with Sasol Ltd to build and operate an HDPE plant on the Battleground site in Texas. U.S. Acquisitions + Disinvestment September 2017: INEOS Upstream Ltd acquired more natural gas assets in the North Sea through the acquisition of DONOS Energy A/S. Nov.2016 oil and gas business: The Group acquired 100% of the shares of WLP Holding Corporation, one of the largest manufacturers of high density polyethylene (HDPE) tubes in North America. WLP Plastics has more than 500m of capacity provides HDPE pipe for use in municipal oil, gas, industrial, mining, conduit and water and sewer applications. In addition, in 2016, following a strategic review of the business of INEOS Technologies, Technologies, stop marketing your polyolefin licensing technology externally and transfer the remaining parts of INEOS Technologies' business to existing companies within the Group to provide a clearer approach to individual product lines. p.47.49.F-32 September 2015: The Group acquired Axiall Corporation's aromatic and semen assets for an initial cash consideration of 57.8m (EUR 51.9 million). The acquisition comprised the world's largest cumene plant in Pasadena, Texas. In addition, Axiall's phenol, acetone and alpha-methylstyrene business was transferred to the INEOS phenol facility in Mobile, Alabama, p.49, F-33 Jul 2015: Completed the purchase of the remaining 50% stake in the Noretyl AS joint venture of the Noretyl ethylene cookie in Rafnes, Norway, the of the INOVYN group (was the Kerling Group), related part. This acquisition is part of the O&P Europe - North segment. Noretyl AS became an absolutely owned subsidiary of the Group (see Note 13.b). p.F-44 In 2015, it also acquired aromatics and cumene assets from Axiall Corporation for an initial cash consideration of 57.8m (51.9 million euros). The acquisition comprised the world's largest cumene plant in Pasadena, Texas. In addition, Axiall's phenol, acetone and alpha-methylstyrene business was transferred to the INEOS phenol facility in Mobile, Alabama. Ineos Bamble AS, a subsidiary of INEOS Holdings SA Group, holds a 50% stake in Noretyl AS, with the Kerling Group with the other 50% stake in the JV. Noretyl AS operates a hydrocarbon cracking plant in Rafnes, Norway (2012 BC, p.96). 2015: INEOS Upstream Ltd acquired natural gas assets in the North Sea from a UK subsidiary of DEA Deutsche Erdöl AG, which is part of the LetterOne Group and Fairfield Energy (owned by Mitsubishi-owned Decom Energy Ltd) (collectively, the 2015 Upstream Acquisitions) in the form of an acquisition of some of its subsidiaries. INEOS Upstream Ltd is a wholly owned, oil and gas subsidiary of INEOS Ltd. Nov.2014: Styrolution was previously a 50-50 joint venture between INEOS Industries Holdings Ltd and BASF. Ineos Industries Ltd completed the acquisition of BASF's 50% stake in Styrolution for a purchase price of 1.1 billion euros. (? INEOS Styrolution Holding GmbH?) 64, 105. Styrolution is a joint venture between INEOS Industries Holdings Ltd (which owns 50% of the styrolution through its stake in Styrolution Holding GmbH), BASF SE (which owns 34.05% Styrolution through its stake in Styrolution Holding GmbH) and BASF Antwerpen NV (which owns 15.95% of Styrolution through its stake in Styrolution Holding GmbH). INEOS Industries Holdings Ltd is a wholly owned subsidiary of INEOS Industries Ltd, and INEOS Industries Ltd is a subsidiary of INEOS AG, thus making it a subsidiary of ours. 2012 BC, p.97 July 2014: The Group completed the disposal of Lavéra's petrochemical assets and businesses, together with O&P Euro's other French and Italian assets (O&P South), to a new subsidiary subsidiary INEOS AG, for a total consideration of EUR 200 million. Intermediate assets in the Lavéra complex are not assets of the Group, are not part of the restricted group under the Indenture and will form an independent financial group. These agreements have been launched as part of a restructuring plan for these companies, which have performed historically. The restructuring plan aims to improve the reliability and cost base of the Lavéra site in the future, p.49, July 2014: Our subsidiaries INEOS Group AG and INEOS Europe AG have been rid of certain petrochemical assets and businesses in France and Italy to a subsidiary of INEOS AG, a wholly owned company of our ultimate parent company INEOS Ltd. The businesses arranged comprise a petrochemical business on the Lavéra site in France, as well as certain other businesses and assets in France and Italy that were formerly part of our European olefins & polymers business unit (the assets and businesses arranged are collectively known as Lavéra's businesses). The acquirer of Lavéra's business is not part of the Restricted Group. p.92 Oct.2013: The shares, assets + liabilities of INEOS Chemicals Grangemouth Ltd and INEOS Commercial Services UK were transferred to INEOS Grangemouth plc (was INEOS Grangemouth Ltd), a newly created subsidiary of INEOS Holdings AG, our indirect parent company. The company was re-domiciled in the UK and became eligible for support under the UK Government's Infrastructure Guarantee System, which it has taken advantage of. ... significant investment in new infrastructure to allow the site to import gas from the United States, p.47. Grangemouth's disinvestment was implemented under a restructuring to address concerns that the operations carried out by INEOS Commercial Services UK Limited and INEOS Chemicals Grangemouth Limited at the Grangemouth site had been losses over the previous 4 years, mainly due to a high fixed cost base at the Grangemouth site and a decrease in supplies of suitable raw materials. The plan ... significant investment to allow the site to import ethanol from the United States. The investment was financed from revenue from the INEOS Grangemouth plc issue in August 2014 of EUR 285 million 0.75% Guaranteed Notes due in 2019, which are guaranteed by the UK Government's Infrastructure Guarantee System. p.91 Jul.2011: Transferred the Refining, Business Business (Refining) Business and certain infrastructure assets to 3 joint ventures outside the INEOS Group. 2017 a/cs, p.47.F-44; 2012 a/cs, p.81 Lux I subsidiaries get rid of: (i) the Refining Business and Entrepreneurship Business (Refining) to JVs formed between PetroChina and INEOS (Jersey) Ltd and (ii) the Infrastructure Entity to a JV owned by INEOS Investments (Jersey) Ltd (50.0%) and Business JV Refining (50.0%). The alienation of the Refining Business, Business Business (Refining) and Infrastructure Entity was primarily a provision of the Refining segment of the Group reportedly in IGH's financial statements. The refining business and business (refining) businesses in connection with refining and disinvestment consist mainly of crude refining operations carried out at refineries located in Grangemouth, Scotland, and Lavéra, France, and related business activities. Refining disinvestment also involved the transfer to the Infrastructure Entity of certain related infrastructure assets (mainly a power plant in Grangemouth, Scotland, and a terminal and other facilities). ... The infrastructure entity ... is jointly owned by INEOS Investments and Refining Business JV, p.90 Mar.2010: Completed the sale of its fluorochemical business to Mexichem Fluor S.A. de C.V., a subsidiary of Mexichem S.A.B. de C.V. a leading Latin American producer of PVC, chloralkali, hydrofluoric acid and fluorospar tubes and resin. The sale included international business and assets related to the Group's fluorochemical operations located in North America, Europe and Asia. Activities related to the Clean Development Mechanism (CDM) and fluorospar (Minas Gledbe) remained with Ineos. 2012 BC, F-31 January 2010: Completed the sale of ChlorVinyls and Compounds Switzerland's business to Kerling plc, a new holding company formed to combine Ineos Enterprises, Ineos ChlorVinyls and the Ineos Norwegian Polymers business. 2012 BC, p.F-31 Dec.2005: The combination of INEOS and Innovene represented a transformative milestone, providing global scale and greater upstream integration. 2005: With regard to the separation of certain businesses that INEOS acquired from BP in December 2005..., p.100 Agreement for the Sale of Shares of 7 October 2005, as amended from time to time, between certain subsidiaries of BP, IHL, certain subsidiaries of IHL and INEOS Group Limited..., December 2005: the purchase by INEOS Group Holdings on December 16, 2005 of all the shares and assets that make up Innovene's business under the Acquisition Agreement..., Apr.1998: INEOS was established with the acquisition of Inspec plc's Belgian Oxide assets. Ratcliffe left Inspec to lead the acquisition of Inspec's INEOS plc (now INEOS Oxide), p.102 1992: James Ratcliffe led the successful purchase of Inspec Group plc, p.102 Companies: Ineos Styrolution Holding GmbH, INEOS Upstream Ltd INEOS Commercial Services UK Ltd INEOS Chemicals Grangemouth Ltd INEOS Europe AG INEOS Derivatives France Ltd INEOS AG, provides operational management services to group companies. INEOS Finance plc INEOS Treasury (UK) Ltd, a wholly owned subsidiary of INEOS Investment Holdings (Germany) Ltd Lux I and some of its subsidiaries (including IHL and INEOS Finance plc), p.120 Ineos Grangemouth plc INEOS Nova JV - INEOS NOVA International SA, INEOS NOVA UK Limited, INEOS NOVA Netherlands BV, INEOS NOVA BV Technology, INEOS NOVA BV, INEOS NOVA NOVA INEOS NOVA Ribécourt SAS and INEOS NOVA Holding France SAS INEOS Infrastructure (Grangemouth) Ltd, an entity that acquired certain infrastructure assets in Grangemouth, Scotland and a terminal and other facilities), and which, following the disinvestment of refining, is jointly owned by INEOS Investments (50.0%) and the JV refining business (50.0%); Main subsidiaries, p.F-46 INEOS European Holdings Ltd INEOS Finance Plc INEOS Treasury (UK) Ltd Ineos Fluor Ltd Ineos Silicas Ltd Ineos Commercial Services UK Ltd INEOS Oxide Ltd INEOS Sales (UK) INEOS Nitrides (United Kingdom) Ltd Ineos Compounds UK Ltd INEOS Manufacturing (Hull) Ltd INEOS Technologies (Vinyls) Ltd Ineos Bio Ltd Ineos Healthcare Ltd The Group has a preferential non-voting stake in Ineos Investments Partnership, an entity subject to common control by the Group's final shareholders, which holds 24% of PQ Corporation's share capital, a silica business incorporated in the U.S. and listed on the New York Stock Exchange. Joint Ventures Cedar Bayou in Texas, operated by Chevron Phillips Company LLC in a 50/50 joint venture with Chevron Phillips. JV with Sasol Ltd, a new co. called Ineos Gemini HDPE Co LLC to build a facility to manufacture high-density polyethylene, went into operation in late 2017, p.??, p.64 Refining VJs are located between PetroChina and INEOS Investments (Jersey) Ltd, a related part. INEOS Investments, whose shareholders are IGH's main shareholders, holds 49.9%, 50.1% and a direct 50.0% stake in Business JV Empressal (Refining), Refining Business JV and Infrastructure Entity, respectively. INEOS Investments holds an indirect 25.05% stake in the Infrastructure Entity through its 50.1% stake in the JV Refining Business, p.106. Petroineos Refining Ltd, refining, Lavéra, France + Grangemouth, Scotland, 50.1% Petroineos Trading Limited, refining, Lavéra, France + Grangemouth, Scotland, 59.9% Ineos Infrastructure (Grangemouth) Ltd, refining, Grangemouth, Scotland, 75% Ineos Gemini HDPE Co LLC, chemicals, Texas, 50% Joint Ventures outside the Group French joint ventures associated with Lavéra's petrochemical assets and businesses that were unvested by the Group in 201.2 July 14, 2014 and a joint venture with Sasol Ltd to build and operate an HDPE plant at the Battleground site in Texas, USA that went into operation at the end of 2017, p.106. Jul.2014: The Group established a JV with Sasol to build and operate an HDPE plant on the Battleground site in Texas. The plant is expected to be operational in 2017. p.F-44 Ineos is quite open and frank about climate change legislation that negatively affects businesses; ditto re chemical impact on the environment. A/cs 2017, p.14, p.97 Acquires substantial proportion of BP raw materials, p.20. Highly leveraged, p.22. Use Carbon Trading, p.96. The business is operated through 3 segments: Olefins & Polymers Europe, p.73, p.78 p.78 Density Polyethylene (HDPE): Automotive fuel tank, milk bottle, high-performance pipe and blow molded applications Low Density polyethylene (LDPE): special applications in the wire and cable sectors, medical and coating sectors Low Density Linear Polyethylene (LLDPE): sold primarily to customers in the film polypropylene (PP) sector (+ sealing film): high-module pipe and related applications, Highly reinforced impact copolymers for injection molding, olefins & Polymers North America medical BOPP films and heat-sealers, 73, 82 Polyethylene: high density polyethylene sludge loop, for use in the manufacture of food packaging, household chemical packaging, pipes, injection molded products such as lids and closures, and boxes and buckets. Polypropylene: boxes and trays, roof membranes, food packaging, carpets, automotive products, DVD cases, ropes and toys, manufactures polyethylene pipe through our subsidiary, WLP Plastics. WLP Plastics was acquired in November 2016. Chemical intermediates Four main product groups: INEOS nitrides, INEOS oligomers, INEOS oxide and phenol ineos. INEOS Enterprises activities are also included in Chemical Intermediates. Together they produce a wide range of products including phenol, acetone, alphas olefins, ethylene oxide and derivatives, acrylonitrile, ammonia and nitric acid. We have a total of 16 manufacturing plants worldwide, with many of our plants integrated directly with their key raw materials on site, or through pipe connection. p.73 The products we manufacture are derived from crude oil and natural gas, and include olefins, polymers and various petrochemicals derived directly or indirectly from olefins. Our products serve a wide and diverse range of end markets, including packaging, construction, automotive, white/durable products, agrochemicals and pharmaceuticals. A/cs 2017, p.46, diagram p.70. We operate a total of 17 olefin and polyolefin sites, including our large integrated olefin and polyolefin cookie facilities in K'In, Germany, Rafnes, Norway, and Chocolate Bayou, Texas, USA and seven polyethylene pipe manufacturing plants within the United States. These facilities support our highly competitive patented polyolefin processing technologies. Technologies include our cost-effective gas-phase polypropylene technology, our specialized high-density polyethylene technology, and our patented flexible swing technology for low-density, high-density linear polyethylene. p.72 Petrochemicals Ineos Enterprises Key product: Ammonia (intermediate mnf. for nitric acid, polymer resins, textiles), acid (polyurethanes). p.85, 86 Manufactures ammonia and nitric acid in the city of Cologne, Germany. p.88 Ineos Nitrides Key products: Acrylonitrile (acrylics, styrene polymers), Acetonitrile (solvents), hydrogen cyanide (gold extraction, persexp, animal feed), acetone cyanohydrin cyanohydrin ammonium sulfate (fertilizers), Oxazole (chemical intermediates), acrylonitrile catalysts. p.85,86 Operates from 4 sites: Green Lake, Texas; Lima, Ohio; BASF's former site in Seal Sands, north-east England; Köln, Germany. p.88 Ineos Olefins Key products: Polymers Euro Ineos Olefins & Polymers USA Ineos Oligomers Key Products: Linear Alpha Olefins (Polyethylene, Synthetic Lubricants, detergents, oil drilling chemicals), polyalpha olefins (synthetic lubricants), isoolefins, isoparaffines, specialties (pneumatics, acids, agrochemicals, fragrances, cosmetics, blowing agents), gas/SPEC special amine solvents and additives (carbon degassing, natural gas processing, LNG, various refining operations), gas/SPEC process technology packages. p.85, 86 Operates from 4 sites: Joffre, Alberta, Canada; La Porte, Texas; Feluy, Belgium; Köln, Germany. A new 420,000-ton linear alpha olefin plant in Chocolate Bayou, Texas, will be operational in early 2019. p.88 Bone oxide Key products: ethylene oxide and derivatives (polyester resins, fibers, detergents, agrochemicals, surfactants, cosmetics, glyphosates, pharmaceuticals, synthetic lubricants), propylene oxide and derivatives (polyurethane foam and resins), ethyl norbornene monomer, ethyl and butyl acetates (surface coatings, inks, paints), p.85, 86 Opera from 4 main sites: Antwerp, Plaquemine, Köln, Helmet. The Antwerp site has its own jetty plant on the Scheldt River, which links it to the port of Antwerp and the Amsterdam Rotterdam Antwerp pipeline, with rail and road tanker cargo facilities. The Plaquemine plant is a privileged place for the production of chemicals due to advantageous access to raw materials and direct access to maritime jetties. p.88 Phenol Ineos Key Products: Phenol (Polycarbonates, epoxy and phenolic resins, pharmaceuticals and nylon intermediates), acetone (bisphenol A, methylmethacrylate, polymethylmethacrylate, pharmaceuticals, solvents, coatings, personal care products, agrochemicals), Cumene (raw material to produce phenol and acetone), alaphemethylstyretan (heat thermorecstrals, tackfics, coatings and antioxidants), p.85, 86 Operates phenol and acetone plants in 3 sites: Gladbeck, Germany, Antwerp, Belgium; mobile, Alabama. Gladbeck receives its raw materials by pipeline from a cumene plant owned by INEOS (Marl), Germany has direct access to deep water. The mobile plant is in Mobile Bay, in the Gulf of Mexico. Ineos has direct access to deep water. The mobile plant is in Mobile Bay, in the Gulf of Mexico. The whole it is supplied by boat mainly from a cumene plant owned by INEOS (Pasadena, Texas) or producers on the Gulf Coast or Asia. Approximately half of the phenol and acetone produced is transported by boat and barge, while the balance goes by rail and road. INEOS Phenol operates two cumene cumene marl, Germany and Pasadena, Texas. Two cumene plants are in places in Marl, Germany and Pasadena, Texas. p.88 Ineos Polyolefin Catalyst Ineos Styrolution Ineos Inovyn INOVYN Finance Plc ?. INOVYN is a trademark of INOVYN ChlorVinyls Ltd. Wholly owned by INEOS, INOVYN is the supplier of choice for manufacturers worldwide. INOVYN's strengths throughout its extensive chloride activities create a global business that continues to serve its customers and responds quickly to changing European markets.ref Formed on July 1, 2015, INOVYN is a vinyl producer that is among the top three globally. With an annual turnover of more than 3.5bn euros, INOVYN has more than 4,300 employees and manufacturing, sales and marketing operations in eight countries in Europe. Our portfolio consists of a wide range of class-leading products arranged in general purpose vinyls, special vinyls, organic chlorine derivatives, Chlor Alkali and electrochemistry and vinyl technologies. Annual production volumes exceed 40 million tonnes.ref INOVYN is the European leader in vinyl and one of the three largest vinyl producers in the world. Vinyls are by far the most versatile thermoplastics in history and INOVYN caters to the different needs of the market through two dedicated business units: General Purpose Vinyls and Specialty Vinyls.ref INOVYN manufactures a wide range of chemicals that are used as raw materials in almost all industrial processes. Our portfolio is organized into five key product groups: organic chlorine derivatives; alcaidérico chloride; general purpose vinyls; special vinyls; and technologies.ref INOVYN is delighted to have worked in partnership with the UK Chemical Industries Association and ITN Productions to create an exciting program with key industry reviews and news style reports along with sponsored editorial profiles. The program, called Solutions for Our Future, launched at the CIA Annual Conference in London on November 15, 2018, focuses on the importance of the multimillion-dollar chemical industry and the significant impact the sector has on our daily lives, economic progress and the future for the next generation. In its contribution, INOVYN talks about its role in VinylPlus and the investment it continues to make to deliver a sustainable future for the entire PVC value chain. INEOS also made a significant contribution to the program, discussing its investment in the Scottish energy and its chemical company manufacturing hub.ref A very carefully crafted piece of propaganda. For example: We need to consider the entire life cycle of the material, from the development point, to the end point where it is reused. Not to mention that 80% (gues) of De Ineos products are single-use plastics. Ineos Oil & Gas UK It consists of the assets of Ineos Breagh and mainly in west Shetlands acquired from DONG Energy. The business is led by David Brooks as CEO, and is based in London. Ineos Oil & Gas Denmark consists of operated and an operated oil and gas assets located in Denmark. The business is headed by Flemming Horn Nielsen as its CEO with offices and operations in Esbjerg and Gentofte, Denmark. Ineos Oil & Gas Norway It consists of assets located in Norway. The business is led by Sebastian Koks Andreassen as CEO with his office located in Stavanger, Norway. Ineos FPS Consists of the Forties Piping System, Kinnel Terminal and Gas Processing Plant, Dalmeny Terminal, Aberdeen Sites, Forties Unity Platform and Associated Infrastructure. It offers almost 40% of the oil and gas of the UK North Sea. Led by Andrew Gardner as CEO, with operations in Falkirk and Aberdeen. Ineos Trading & Shipping x Ineos Upstream Services A new company that will provide a wide range of high quality upstream services to INEOS and the wider upstream market. The fleet currently consists of ground seismic surveying equipment and ground well stimulation equipment and well testing. The business is led by Geoff Holmes as COO and is located in London, United Kingdom. Ineos Shale Ineos Shales Shale focuses on ground gas development. He is the largest player in the UK's underground shale gas sector, with access to more than 1.3 million acres of world-class shale exploration areas in England and Scotland. Ron Coyle is CEO, and the business is based in London, United Kingdom. Nov.2014: Ineos announced an expected investment of 665 million pounds in the exploration and evaluation of Shale Gas in the United Kingdom. The gas would be used as a raw material for chemicals at the company's Grangemouth plant, rather than as fuel. The company has guaranteed to give local communities 6% of the revenue generated (4% to homeowners and land above the well, and 2% to the local community in general). The vast majority of Ineos' offerings are found in Scotland and northern England, where local populations have a mining or industrial heritage. Ineos already owns two substantial shale licenses in Scotland, comprising more than 120,000 acres, as well as investing another 400 million euros in a project to bring U.S. shale gas to Grangemouth. [1] Joint ventures: Petroineos Petroineos comprises joint ventures for negotiation and refining between Ineos and PetroChina International (London) Company Ltd. The company is Europe's leading independent crude oil refinery. Petroineos refineries are strategically located in Grangemouth Scotland and Lavéra France. The Lavéra refinery is located on the coast of the commercial basin Mediterranean crude oil, next to the port of Marseille. It supplies fuel by pipeline to France, Switzerland and southern Germany. The Grangemouth refinery is located in the Firth of Forth with direct access to crude oil and gas from the North Sea. It provides fuel to Scotland, Northern England and Northern Ireland. In 2013, Unite agreed not to strike for 3 years, a step into a more modern pension plan, a for 3 years, and changes to trade union agreements on the spot, including not full-time union conveners. Ratcliffe said he was investing 300 million pounds to finance ongoing losses and finance the construction of a gas terminal to import shale gas from the United States. The Scottish government has indicated that it will support the company's application for a grant of EUR 9 million to help finance the terminal and the UK government has given its prequalification approval for a loan guarantee facility of 125 million pounds. [2] Ineos Automotive Ineos Automotive was founded in 2016. Projekt Grenadier is his first project, named after the pub in which he first imagined himself. The firm is currently in negotiations to determine the most suitable place for vehicle production. Lime Wood Group Think this is owned separately by Ratcliffe, i.e. not strictly speaking part of Ineos. Timeline 2018: Ineos Group Holdings SA reported record annual profits of 2.3bn euros. Net debt was 4.8bn euros in December 2017. [3] 2016: Ineos Automotive founded. Jul.2011: Petroineos were formed; Joint venture with PetroChina International (London) Company Ltd.ref 2010: Ratcliffe and his team left the UK for Switzerland and a much lower corporate tax rate, moving about 60 families to Rolle, already home to foreign outposts of several multinationals. 2008: Ineos asked labourers (Blair) for a temporary postponement of VAT payments, some EUR 350 million; the government said No. 2008: Ineos Silicas is sold to PQ. 2005: Innovene: the agreement that would propel Ineos to the big leagues of global chemical companies: BP's massive chemicals business. Grangemouth was one of its plants. 2004: Ineos Enterprises formed. 2001: Acquired Crossfield from ICI, and formed Ineos Silicas. 1998: Ineos was formed to acquire BP's former site in Antwerp from Inspec. Articles Nov.16.2018: Ineos dots the resin business in a \$1.1bn deal. Ineos said its business division had agreed to buy the entire compound business of Ashland Global Holdings, which has 20 manufacturing plants in Europe, America, Asia and the Middle East, and manufactures products such as resins, layers of gel and corrosion-resistant fiberglass reinforced plastic, used in the construction of ships and other vehicles. The deal is the latest in a series of Ineos acquisitions and investments that has led the company to expand from its petrochemical roots to a command position in North Sea oil and gas, and enter industries such as fashion and automobile manufacturing. It has, also amassed most of the shale gas exploration rights in Britain Company. The Times, Emily Gosden. References References
